

IN MEMORIAM

BAMBANG SUNARNO (1949-2005)

Tutie Djarwaningsih

Herbarium Bogoriense, Pusat Penelitian Biologi-LIPI, Bogor

After a long illness, Dr. Bambang Sunarno died in Bogor on 5 November 2005. Before joining the Herbarium Bogoriense in 1983, he was a librarian in the Central Library for Biology and Agriculture Bibliotheca Bogoriensis. At that time he was enrolled as student in Soedirman University in Purwokerto, and it was while working for his sarjana degree that he came to Herbarium Bogoriense. Noting that he is a good draughtsman, Dr. Mien A. Rifai asked him to study the architecture of weeds in relation to tree architecture studied by Prof. Halle in France. He successfully completed his study and in cooperation with Prof. Halle published his research result.

In 1986, he received a scholarship to continue his study in Gadjah Mada University for his Master degree under the supervision of Prof. Ir. Gembong Tjitrosoepomo. He served as an Assistant Scientific Officer in Prosea Network Office (1994-1995) and

acted as an Associate Editor for Prosea publication 5(2): Timber Trees: Minor Commercial Timber which was published in 1995. He got his PhD from Tohoku University, Sendai, Japan under the supervision of Dr. Hiroyoshi Ohashi (Japan) and Dr. Harry Wiriadinata (Bogor). He has revised *Dalbergia* (Fabaceae), *Labisia* (Myrsinaceae) in Malesia and produced 5 new species *Dalbergia*, 3 new species, 2 new varieties and 2 new combinations *Labisia*.
